

COMPANY PROFILE

CV. JASA TEKINDO PERSADA founded in 1997 is professional Mechanical - Electrical and Environmental Services, located in Denpasar, Bali. We are experienced in procurement of electrical equipment installation, HVAC Consultant and installation, Sewage Treatment Plant (STP), Water Treatment Plant (WTP), Pond and Swimming Pool System.

We aim to be the best partner for company and institutions that need best mechanical - electrical and environmental services. Our company supported by well-educated, experienced staff in mechanical - electrical and environmental engineering, graduated from reputable university in Indonesia and Asia Pacific Region. Based on our experience, best personnel education background, appropriate technological skill personnel, make us the best candidates to solve mechanical-electrical and environmental problems at your premises.

Scope of Business

- Mechanical - Electrical Installation and Consultant

Design and install all electrical wiring, Systems and equipment based on actual needs required. Managing tidiness and layout placement of ME instalation for safety, effective and well-organized is our focus.

- HVAC Installation and Consultant

Design and install HVAC equipment to reach energy efficient on HVAC system for best, including best installation on Plumbing and ducting.

- Environmental Services

Design and build water and wastewater treatment facility/or plant which made based on the quality and source of raw water or wastewater, with core features:

1. Low energy consumption
2. Easy to operate and maintain - basic skilled operator
3. The effluent of treatment is designed to meet local, state, and national environmental standards

Design and develop civil structure for environmental facility which based on accurate calculation on safety and operation of the building. Using local raw material in building construction is our other concern. Each of our design consists of breakdown of material and schedule to give you clear information of project plan .
